DANIEL RODRIGUEZ

Full Stack Web Developer / DevOps / Linux Sysadmin

- Computer Science Engineer with over 10+ years experience working as a Full-Stack Drupal/Web Developer for scalable websites/applications (PWA).
- I am a Drupal enthusiast: I do contribute to the Drupal module ecosystem (code/patches/documentation) from time to time.
- Always looking for challenging projects that involves not only my knowledge and my skills but also that allows me to learn new frameworks/APIs or programming skills (currently mastering ReactJS/Javascript and learning Golang)
- Excellent communication skills: ability to explain ideas/concepts to non technical users and stakeholders, I always feel a great satisfaction when the issue reported by the end-user gets resolved and you learn something new from it !
- I am also passionate about GNU/Linux with over 10+ years experience as a Linux System Administrator on day-to-day sysadmin tasks and recently, DevOps tasks. I'm also have some experience working with *BSD systems (learning some FreeBSD/OpenBSD)

SKILLS

HTML5 - CSS3 - SASS - Bootstrap 5 - JavaScript - ReactJS - Drupal - Wordpress - Gulp.js - Dart - Grunt.js - Site Building - PHP - SQL Databases - Rest APIs - SOAP - Scrum/Agile - DevOps - DigitalOcean - Pantheon - Acquia - AWS - Linux - UNIX - Bash scripting - Varnish - Apache - NGINX - MySQL - GIT - WXT - Gitlab CI/CD - GitHub Actions - WCAG - AODA - Golang (on training) - Elasticsearch - Solr - PHPUnit - QA - Unit/Functional Testing - Selenium - Trello - Jira

WORK EXPERIENCE

Web Developer

OPTASY Inc. January 2022 - Present

- Implemented a custom payment gateway for processing wire payments (cheque payments) for a donation platform (https://www.givegreen.com/) that runs on top of Drupal Commerce 2 (Drupal 10). A mix of Drupal API calls, Custom PHP functionality (Drupal API calls) and a new VUE.js module was implemented in order to achieve this.
- Maintainer of SShop (https://www.drupal.org/project/sshop), which is a Drupal 9/10 theme configured for Commerce and based on Bootstrap 3. Applied many changes such as migration from Gulp.js to “Dart sass” which greatly simplified the build and stability of our sass process. Applied many SASS and JS enhancements and optimizations.
- Applied maintenance tasks (plugin and security updates) and styling/theming changes in the wordpress sites https://kirkorarchitects.com/ and https://choosecanadaorganic.ca/
- Performed upgrades on Drupal Contrib modules maintained by us (Optasy Inc) in order to make them ready to be used in Drupal 9 and Drupal 10/11 sites.
- Developed a GET/POST REST API endpoints on a Drupal 9 site that was used as a backend for a mobile application for foodies and restaurant owners.
- Performed support on legacy Drupal 6/7/8/9 sites: Security updates, theme changes, views changes, custom PHP functionality (Custom Drupal Modules) when needed.
- Implemented a custom JavaScript/Node.js application to draw markers (fed by an external Google Spreadsheet) on a map using the Google Maps API. This app was integrated to an existing Drupal 9 site.
- Developed a GET/POST REST API endpoints on a Drupal 9 site that was used as a backend for a mobile application for foodies and restaurant owners. I used the Postman tool to test out the REST Endpoints.
- Maintainer of Gutenberg AI Tools, a Drupal Module for the Gutenberg Editor which implements a block plugin written in React/JSX/JS that enables an AI prompt where you can ask a question to any AI Engine and the answer will be render in a single block, please check the module URL for screenshots and installation instructions.
- Developed Unit/Kernel/Functional/FunctionaJavascript tests for many of our Drupal contrib modules that we maintain (and some custom modules for some of our client's websites), by using the PHPUnit framework, along with manual and automated QA testing using an internal tool.
- Used Jira/Confluence as a project management tool and for writing documentation for any specific details of our client’s websites.
- Provided support for legacy Drupal 6-9 sites.
- Worked on integration of a Google SpreadSheet (that contained coordinates and data of one of our customers) with the Google Maps API in order to display client’s information in an interactive manner. I used a combination of NodeJS (for pulling up the data from the spreadsheet) and Javascript/HTML to render the markers in the map.

- Performed upgrades on older Drupal 8 contrib modules maintained by us (OPTASY Inc) in order to make them ready to be used in Drupal 9 sites.
- Applied misc custom development on many of the client's Drupal sites (mostly hosted on cloud platforms like Acquia or Pantheon) as needed, extensive work was done on integration of custom views with the Solr Search Engine (Search API).

Web Developer

OPTASY Inc. September 2021 - November 2021

- Provided support for legacy Drupal 6-9 sites.
- Worked on integration of a Google SpreadSheet (that contained coordinates and data of one of our customers) with the Google Maps API in order to display client's information in an interactive manner. I used a combination of NodeJS (for pulling up the data from the spreadsheet) and Javascript/HTML to render the markers in the map.
- Performed upgrades on older Drupal 8 contrib modules maintained by us (OPTASY Inc) in order to make them ready to be used in Drupal 9 sites.
- Applied misc custom development on many of the client's Drupal sites (mostly hosted on cloud platforms like Acquia or Pantheon) as needed, extensive work was done on integration of custom views with the Solr Search Engine (Search API).
- Applied requested styling/theming changes on many of the client's Drupal sites, with the help of tools such as Gulp.js, npm and Grunt.
- Applied custom frontend work (mostly new Twig/PHP/CSS/JS code) on existing themes designed/implemented for our clients.

Senior Drupal Developer

Cyan Solutions March 2019 - August 2021

- Created new Drupal 7/8/9/10 custom themes (Bootstrap5 and Zen Sub-themes) from scratch from PSD/AI files.
- Built a Drupal 8 site from scratch for the Canadian Association of Optometrists (https://opto.ca/) a custom theme (mix of PHP/Twig/Javascript files) was implemented for this site (Bootstrap 5 Sub-theme and custom SASS/Javascript modules for the frontend). Built a few Custom Drupal modules (implemented to run on PHP 8.1+) for the Eye Health Library and Find a Doc tools for finding optometrists country-wide. Site maintenance (security and functionality updates).
- Built a Drupal 10 website for the Vision at work campaign requested by CAO (https://visionatwork.ca/), created a subtheme for the website using the base theme Bootstrap 5, applied site building to display informative pages.

Implemented a catalog to display available glasses for people with vision impairment. Integrated the “Find a Doc” tool (Wicket AI integration).

- Created a website for the CAO “Don’t lose sight” campaign (https://dontlosesight.ca/), created a subtheme for the website using the base theme Bootstrap 5. Used the paragraphs contrib module to create reusable components (CTA Box, Content Cards, Basic Image, Button, Text and Media Section) that are displayed in informative pages. Set up Elastic Search to index all the resources that are displayed in the Information Hub.
- Refactored the website for the Canadian Agricultural Human Resource Council (https://cahrc-ccrha.ca/) with Drupal 9. Set up a bootstrap 5 subtheme for the display. Used the paragraphs contrib module to create reusable components (CTA Box, Content Cards, Basic Image, Button, Text and Media Section) that are displayed in informative pages. Set up localization services (English and French).
- Performed security updates on our client’s Drupal sites (Drupal Core and contributed modules).
- Created a custom Drupal 8 gateway payment system for handling the online donations for the Beechwood Cemetery (https://beechwoodottawa.ca/en/donation), this custom module (mix of PHP and API calls to Stripe) was built on top of the Drupal Commerce 2 API subsystem.
- Performed site upgrades from Drupal 8 to Drupal 9/10 by applying core and contrib upgrades (using composer), custom (PHP) patches when needed and re-factoring of custom modules.
- Provided IT/DevOps Support to the company’s Linux server that hosted many of the client’s websites: applied security packages, security policies and performance enhancements, day-to-day tasks, created new accounts/service configuration to host new site clients, server integration with the Gitlab pipelines.
- Maintained our Git repository (hosted on Gitlab) for our projects, implemented Gitlab CI/CD pipelines for deployment of the code/theme changes to the live-stage sites.
- Maintenance and support of the current Drupal 10/11 sites, performed updates to recent releases to make sure the sites are up to date with the security updates and running with no deprecated/unsupported modules.
- Helped launching the new site for the Association of Justice Council (https://www.ajc-ajj.ca/): Applied some refactoring in the intake form (https://www.ajc-ajj.ca/representation/intake-form) to make it more user friendly. Added conditional rules requested by the client. Applied formatting fixes in the outgoing emails. Changed the deployment workflow to avoid the changes at the .htaccess file to be lost every time there is a core update. Extra Front-End work as requested by the client.
- Implemented a student registration workflow for the Canadian Association of Optometrists's website (https://opto.ca/) that connects to the Wicket API and allows the CAO admins to allow or deny the registration from https://opto.ca/student-membership-form

- I applied fixes on many issues with the global search results for the Coaching Association of Canada's website (https://www.coach.ca/): Some pages that needed to be excluded and I applied some rules for that. I added a rule (hook implementation) to exclude french results in english search pages and vice versa.
- Set up SSO (single sign on) between one of our client's Drupal Website and their internal Azure authentication system.
- Wrote documentation for the client for each of the delivered functionality using the Scribe platform .
- Performed automated QA testing using Selenium and wrote automated testing using PHPUnit for Unit/Functional/FunctionalJavascript/Kernel testing in order to spot errors and fix them.
- I used Trello as a project management tool for all of our projects and for tracking the project's progress.
- Performed interoperativity tests on all of the client's websites and made sure they are rendered ok on different devices: Desktop and Mobile (iOS/Android).

Drupal Developer

OpenConcept Inc. Dec 2017 - March 2019

- I was part of a development team who built the CNIB site (https://www.cnib.ca/en) , helped the UX experts in implementing some of their suggestions in the theme, and also lots of UX enhancements for ensuring compliance with the WCAG 2.0 AA standard.
- Created custom Drupal 7/8 modules (mix of PHP 7.3 / jQuery / HTML) for additional functionality requested by clients.
- Helped in developing custom mobile-first themes on Drupal 8 following the modular design approach, applied custom styling with CSS3/SASS, implemented custom Twig template files for the special layouts. set-up custom JavaScript/jQuery code for UX enhancements.
- Made contributions on patches for bugs or feature requests for Drupal.org core and contrib modules (https://www.drupal.org/openconcept-consulting-inc).
- Put special effort in making websites to be WCAG 2.0 AA compliant: Changes on the HTML structure to make sure the pages are accessible and readable by screen readers (JAWS/NVDA).
- I implemented the Selenium framework, together with the axe-core library to spot, report and fix accessibility issues and to perform automated QA testing.

Drupal Developer

University of Ottawa - LeverageTek Contractor Sept 2016 - Aug 2017

- Migrated old HTML4 sites from the Faculty of Medicine at uOttawa to the newer Drupal 7 platform customized by the IT Department of uOttawa (HTML5 + CSS3): https://www.uottawa.ca/faculty-medicine/.
- Followed SEO and WCAG 2.0 AA Accessibility standards on migrated sites, specially for content that are both in French and English.
- Validated sites against the Ontario Accessibility Checker (https://www.aoda.ca/) and applied fixes as requested.
- Added custom CSS and HTML code for each one of the migrated sites, if needed, but following the uOttawa's corporate styles and layouts.
- Assisted Faculty staff for updates in their websites.
- Fixed accessibility issues in PDF and WORD files, by making sure that such documents will be read by screen readers.

Application Administrator

Colombian Ministry of Education, Colombia Sept 2015 - March 2016

- Performed day-to-day tasks on Linux servers, such as: backups, restarting/stopping services, installing/upgrading packages, setting up cron jobs, applying security policies and checking cpu, memory and filesystem usage.
- Wrote scripts in BASH for some day-to-day tasks (clearing logs, extracting critical information from JBOSS logs, moving applications between many servers).
- Debugged and fixed applications written in PHP and JAVA by third-party providers.
- Deployed and debugged web applications running on Apache/NGINX/Tomcat/JBOSS/IHS.

Web Architect

E-SINERGIA SAS, Colombia April 2014 – August 2015

- Created custom Drupal 6 and Drupal 7 modules with PHP5 for our clients. Additional client-side functionality done with JavaScript/jQuery.
- Built custom sub themes from scratch, based on Bootstrap 3 and Zen.
- Created WebServices in SOAP and REST for authentication services in one of our projects.
- Ensured good UX and UI standards.
- Ensured compatibility with various web browsers, mainly Chrome, Firefox, IE and Safari.
- Managed our GIT Infrastructure for storing and deploying our code.
- Managed our AWS Infrastructure for hosting our client’s websites and databases.

Unix System Administrator

Getronics Colombia – Citibank Colombia Dec 2012 – Sept 2013

- I was responsible for controlling the operation of a Datacenter of over 20 Unix/Linux servers (HP-UX 11.11, Solaris 8 and 10, AIX 5.3 and RHEL 6, among others).
- Performed day-to-day tasks related to Unix System Administration (backups, installing/removing packages, applying security policies, fixes on the RAID setup).
- Worked with our providers (IBM, Oracle, Dell) for replacing and upgrading hardware components such as disks, cooling fans and CPU units.
- Applied security policies mandated by Citibank headquarters.
- Performed some administration tasks on Windows Server 2003/2008 servers: killing processes, creating users, installing software, creating programmed tasks and checking cpu/disk/memory usage.

Drupal Developer

WIT Solutions SAS, Colombia June 2012 – October 2012

- I was temporarily hired for wrapping up a project that needed to be completed on time. I was part of a small team for building a new Drupal 7 site for a nationwide radio station in Colombia that was launched back in 2012, **BluRadio**: https://www.bluradio.com/
- Implemented an online radio player for the website, using a mixture of Javascript/jQuery functionality, HTML5 templates and custom JavaScript tricks to make sure that the radio player worked with no issues on multiple mobile devices: Android/iOS/BlackBerry Playbook
- Misc theming/styling work in the site: Helped in implementing a new custom theme (based on the Omega theme: https://www.drupal.org/project/omega)

Support Engineer and Web Developer

CEET, Colombia March 2010 – May 2012

- My initial duty was to assist in deploying new changes to the main newspaper's website: https://eltiempo.com
- Performed simple tasks such as setting up apache servers, deploying PHP applications, doing load testing on PHP applications,

installing/upgrading/deleting packages, debugging PHP applications delivered by contractors and other tasks.

- Applied requested theming/styling changes to Drupal 6/7 portals as requested by the client:
  - Portafolio (https://portafolio.co): We launched an initial release of this site (Drupal 7), applied performance enhancements to make it more scalable given the amount of requests for this site.
  - ALO Mujeres (https://alo.co): Launched an initial Drupal 7 site, deployed this site across our farm of Linux servers. Custom functionality as requested by the company.
- Implemented Apache Ant (https://ant.apache.org/) tasks to deploy code/features changes to Drupal 7 sites from the codebase (hosted in a SVN repository).
- Created reports from different database engines (Oracle, MySQL).
- Made legacy sites faster with Redis / Varnish / Memcached.
- Ongoing Onsite / Remote 7/24 support for the infrastructure.

EDUCATION

2002 – 2009 **Bachelor of Computer Science**
Universidad Industrial de Santander. Colombia

CERTIFICATIONS

IELTS General - Took on 02/22/2020 - Overall Score: C1
Test Report Form Number: 19CA01515 RODD 335G (Certificate can be provided if requested)

COURSES AND EVENTS ATTENDED

- **DrupalCon Latin America 2015**
- **DrupalCamp Ottawa 2018:** Topics included Drupal 8 development and site building, along with the latest features that Drupal 8 offered.
- **Drupal North Montreal 2018**
- **DrupalCamp Ottawa 2024**: This event was focused on showcasing how Artificial Intelligence (AI) can benefit our Drupal sites and the tools (modules) that can aid editors/content creators in creating new content for your websites.
